

## CORESTA LIBRARY BOOKS

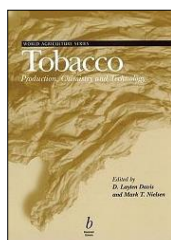

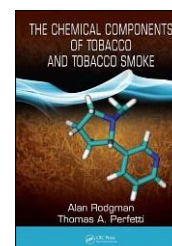

**DISEASES AND PESTS OF TOBACCO** is a comprehensive compilation of tobacco infectious diseases, pests and non-infectious diseases. It also contains a chapter dedicated to integrated pest management. The book contains numerous illustrations and also microscopic images which permit a better diagnosis of some agents which parasitise different host plants. This publication is authored by Teresa Doroszevska, Apoloniusz Berbec, Diana Czarnecka and Magdalena Kawka. To obtain copies please contact the Polish Institute of Soil Science and Plant Cultivation – [www.iung.pulawy.pl](http://www.iung.pulawy.pl).

The **FLUE-CURED TOBACCO GUIDE 2016** and **2015-2016 BURLEY AND DARK TOBACCO PRODUCTION GUIDE** are publications produced by the North Carolina State University in collaboration with agricultural institutions. They contain in depth information on the production of flue-cured, burley and dark tobaccos. Copies of these publications are available in PDF format from the following link: <https://tobacco.ces.ncsu.edu>.

**ALBUM OF NICOTIANA SPECIES** is Poland's first comprehensive compilation of *Nicotiana* species and is based on the *Nicotiana* collection maintained by the Institute of Soils Science and Plant Cultivation-State Research Institute. The collection is one of the world's largest with over 1,000 accessions from many countries around the world. The album has abundant graphical illustrations of the species together with detailed explanatory texts, and is authored by Teresa Doroszevska, Anna Depta and Anna Czubacka. To obtain copies of the book please contact the Institute – [www.iung.pulawy.pl](http://www.iung.pulawy.pl).

**THE CHEMICAL COMPONENTS OF TOBACCO AND TOBACCO SMOKE** compiled by Alan Rodgman and Thomas A Perfetti, two longtime researchers in tobacco smoke, chronicles the extraordinary progress made by scientists in the field of tobacco science from its beginnings in the early 1800s to the present. It provides over 6000 references on more than 8400 components identified in tobacco and tobacco smoke. The book can be ordered through the publisher's website [www.crcpress.com](http://www.crcpress.com).

**TOBACCO: PRODUCTION, CHEMISTRY AND TECHNOLOGY** (Tobacco Monograph), published by Dr. D. Layten DAVIS and Professor Mark T. NIELSEN in 1999. This monograph replaces AKEHURST's book on tobacco, first published in 1968, as the most comprehensive reference work on the subject. If you wish to obtain a copy, please visit the Wiley-Blackwell Publishing website at [www.wiley.com](http://www.wiley.com)

**POST-HARVEST TOBACCO INFESTATION CONTROL** is a manual compiled by members of the Working Group on Infestation Control for post-harvest Tobacco (ICPT). Members of the working group belong to cigarette manufacturing companies. This manual deals with biology, monitoring, sanitation, physical control and insecticides – with separate chapters on insect growth regulators and fumigation. The book was edited by L. Ryan in 1995 and published by Kluwer Academic Publishers. It can be ordered through the website [www.springeronline.com](http://www.springeronline.com)

**TOBACCO DISEASES – Observation, Identification & Control** (*MALADIES DU TABAC - Observer, Identifier, Lutter*) by Dominique Blancard, 1998. This book written in French is a reference for practitioners, researchers, students and teachers. It possesses an original structure and rich pictorial material (more than 500 photographs). The book is available from INRA Editions through the website [www.inra.fr/publications](http://www.inra.fr/publications). An internet website (in French) based on this book is available as a diagnostic tool for tobacco diseases at <http://ephytia.inra.fr>.

**THE GENUS NICOTIANA ILLUSTRATED** was published in 1994 by Japan Tobacco Inc. (JT Plant Breeding and Genetic Research Laboratory). This book is a compilation of worldwide botanical studies on wild species of the Nicotiana. It contains a record of almost every wild species known to date. With the exception of a mere four species, the book includes a complete collection of botanical photographs taken in natural habitats. Each photo is provided with Japanese and English commentaries. JT Inc., 12-62, Higashishinagawa, 4-chome, Shinagawa-ku, Tokyo 140, Japan ([www.jti.co.jp](http://www.jti.co.jp)).

**A NICOTIANA COLLECTION** at the Tobacco Institute of Bergerac, third edition, in French, by Delon R., Poisson C., Bardon J.L., Taillurat P. The third edition is an update of the Nicotianae Catalogue, a collection recognized on national level by CCVS (Conservatoire Français des Collections Végétales Spécialisées). Besides the most important titles such as Nicotiana Species Collection, Nicotiana Species and Geographical Distribution, Botanical Collection in Bergerac, Species and Varieties Collection: date of entry and origin, this edition offers illustrations in colour and some topical items (pollution monitoring, ornamental tobacco and tobacco as a source of protein). It was published in 1999 by SEITA (now Altadis-ITG) Institut du Tabac, Domaine de la Tour, 24100 Bergerac, France ([www.imperial-tobacco-bergerac.com](http://www.imperial-tobacco-bergerac.com)).

In the « **Que sais-je?** » collection, the tobacco edition “**Le Tabac**” was updated by Bernard PITIÉ and Pierre SCHILTZ, SEITA (now SEITA-ITG) specialists on tobacco. The publication contains 128 pages presenting a great deal of information on cigarettes. The book was originally published in French by Presses Universitaires de France (PUF) and is no longer in print.

## TOBACCO PEOPLE

A series of three books created by Sarah Hazlegrove, a fine art and commercial photographer, featuring "Tobacco People" in Brazil, Indonesia and Malawi. The books offer "a different view of the tobacco world", a look "behind the scenes" and "a very simple but beautiful portrayal of the hardworking farmers and the communities where tobacco is grown." A fourth book on "Tobacco People" in Virginia will be published shortly. Copies available from [www.tobacco-people.com](http://www.tobacco-people.com).
